ALLECTUS® 0.225 INSECTICIDE PLUS FERTILIZER

APPLICATION TO TURFGRASS

The use of this product will provide plant nutrients as well as providing control of selected insect pests. LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer can be used for the control of soil inhabiting pests of turfgrasses, for example, northern and southern masked chafers, Cyclocephala borealis, C. immaculata, and/or C. lurida; Asian garden beetle, Maladera castanea; black vine weevil, Olfactorytus sulcatus, European chafer, Rhizotrogus majalis; green June beetle, Cotinis nitida; May or June beetles, Phyllophaga spp.; Japanese beetle, Popillia japonica; oriental beetle, Anomala orientalis; Euxothea humuls nupagra, Sphondrphorus spp.; annual bluegrass weevil, Listronotus maculicollis; black turfgrass ataenius, Attenius apetulus; Aphidius spp.; Crane flies, Tipula spp.; fly, Oesiofella frit, chinch bugs, Blissus spp.; fire ants, Solenopsis spp.; cutworms, Agromis ipsilon, Nephadepas nanaer, armyworms, Spodoptera spp.; Plaebatidae spp.; soil weedworm, Crambus spp. and mole crickets, Scapiterinis ssp. LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer can be used as directed on turfgrass, for example, in home lawns, business and office complexes, shopping centers, multifamily residential complexes, airports, cemeteries, parks, playgrounds, and athletic fields.

The active ingredients LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer have sufficient residual activity so that applications for control of subsurface feeders can be made preceding the egg laying activity. The need for an application for control of subsurface feeders can be based on historical monitoring of the site, previous records or experiences, current season adult trapping or presence of insects at economic thresholds as determined by scouting and/or recommendations of local State extension personnel or other qualified specialists.

Do not apply more than 200 lbs. of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer (0.25 lbs. of imidacloprid, 0.2 lbs. bifenthrin) per acre per application on residential use sites (i.e., around private homes, apartment buildings, condominiums, non-agricultural outbuildings, non-commercial greenhouses, pre-schools or day care facilities). May be applied up to 400 lbs. of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer (0.5 lbs. of imidacloprid, 0.4 lbs. bifenthrin) per application on non-residential use sites (i.e., around institutional, public, commercial or industrial buildings; parks; recreational areas or athletic fields).

Do not apply when turfgrass areas are waterlogged or the soil is saturated with water. Adequate distribution of the active ingredient cannot be achieved when these conditions exist. The treated turf must be in such a condition that the rainfall or irrigation will penetrate vertically in the soil profile. Total amount applied cannot exceed 400 lbs. (0.5 lbs. of imidacloprid, 0.4 lbs. of bifenthrin) per acre per year.

NOTE: Not for use in commercial greenhouses or on grass grown for seed or on golf courses and sod farms. For use on plants intended for aesthetic purposes or climatic modification and being grown in interior plantscapes, ornamental gardens or parks, or on lawns and grounds.

APPLICATION EQUIPMENT

Apply LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer uniformly over the area being treated with normally used granular application equipment. Both drop-type and rotary-type spreaders may be used to apply LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer. Avoid the use of spreaders that apply the material in narrow, concentrated bands. Calibrate application equipment prior to use according to the manufacturer’s directions. Check frequently to be sure equipment is working properly and distributing granules uniformly and accurately.

For fertilization and general insect control in turfgrass areas including athletic fields and parks and residential, commercial, industrial, institutional, and recreational lawns.

Not for use on golf courses or sod farms.

For control of grubs, treats up to 13,613 sq. ft.

For control of surface feeders, treats up to 27,225 sq. ft.

ACTIVE INGREDIENTS:

Imidacloprid, 1-[(6-Chloro-3-pyridinyl) methyl]-N-nitro-2imidazolidinimine 0.125%

Bifenthrin, (2S)-2,2,2-trichloro-1,1-trifluoro-6-(1,2,2-trichlorovinyl)pyridinium chloride 0.100%

OTHER INGREDIENTS: 39.775%

U.S. Patent No. 5,783,203

100.00%

Imidacloprid, 1-[(6-Chloro-3-pyridinyl) methyl]-N-nitro-2-imidazolidinimine

FIRST AID

If on skin:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor for treatment of symptoms. This product contains a pyrethroid. If large amounts have been ingested, milk, cream and other digestible fats and oils may increase absorption and so should be avoided.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Run-off may enter surface water bodies. Water when disposing of equipment washwater or rinsate. Run-off may enter surface water bodies.

This product contains a chemical with properties and characteristics that will increase absorption and so should be avoided.

NOTE: Not for indoor use in commercial greenhouses or on grass grown for seed or on golf courses and sod farms. For use on plants intended for aesthetic purposes or climatic modification and being grown in interior plantscapes, ornamental gardens or parks, or on lawns and grounds.
Turfgrasses

Leaves of surface feeders and weevils: Application rates will vary depending upon speed, equipment wear and condition of sprayer. Carefully calibrate application equipment prior to commercial use of this product.

RESTRICTIONS

- Avoid runoff or puddling of irrigation water following application.
- Avoid application of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer to areas which are subject to flooding in normal rainfall situations (or 5.0 lb of insecticidal active ingredient per acre is sprayed). Do not apply more than 400 lb (0.5 lb of insecticidal and 0.4 lb of bifenixicon) per acre per year.
- Treatment may not be repeated with any crop specified on an insecticidal and a bifenixicon label, or with any crop for which a tolerance exists for the two active ingredients.
- For any crop listed on a label or for bifenixicon, or for crops for which no tolerances for the active ingredients have been established, a 12-month plant-back interval must be observed.
- Do not apply by air.

Not for use in nurseries or commercial greenhouses.

IMPORTANT: READ BEFORE USE.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides. Keep original container and out of the reach of children, preferably in a locked storage area.

Container Disposal: Do not reuse or refill this container. For recycling, call your local waste disposal company. If material is spilled for any reason or cause, carefully contain any spilled material to prevent non-target contamination.
